

Mr. Morgan's increased night symptoms are readily explained by the small ablation diameters evident on his topography combined with the fact that his scotopic pupils are about 6.5 mm. The dramatic increase in his spherical aberration in both eyes when his pupils are dilated correlates well with his subjective complaints. The spherical aberration is also higher in the right eye and he has more complaints about his night vision in that eye.

Sincerely,

A handwritten signature in black ink, appearing to read 'James J. Salz', written in a cursive style.

James J. Salz, M.D.
